

South Heart Public School District #9 School Board Committees for 2016-2017

Committees established by the board may enable board members to become active in the various support areas in the education environment. The effort put forth in committee work will better prepare the board for their support of current and existing programs and to gain insight into planning for future goals for the district.

Board members, please be aware that the function of the committees will be advisory and to assist the Superintendent upon request with fact finding, but never legislative or administrative. All actions of committees will be recommendations to the Board, unless a committee is expressly delegated prior authority by the Board to act upon an issue.
